

**Think you might  
have ear wax!**

**If you think you have ear wax, do not try and clean your ear with cotton buds, a paper clip, your finger or a pencil!!**

**Instead make an appointment with the nurse for ear syringing.**

**BEFORE you come for the appointment, you must put OLIVE OIL DROPS in your ear for 10 DAYS prior to the appointment or syringing may not be successful.**

**Please pick up a leaflet at Reception about ear wax and how to apply the olive oil drops.**

***Thank you***
